

Manual Testing – Execution Summary Report

Project: E-Commerce Application Testing

Application URL: <https://www.demoblaze.com/>

Prepared By: Shubham Khandare

Role: QA Engineer

Date: 06/01/2026

Test Execution Summary

Manual functional testing was conducted on the Demoblaze e-commerce application covering core user workflows including signup, login, product browsing, add to cart, checkout, and logout.

Test cases were designed with a structured approach, covering both positive and negative scenarios. Execution results were recorded accurately with supporting evidence.

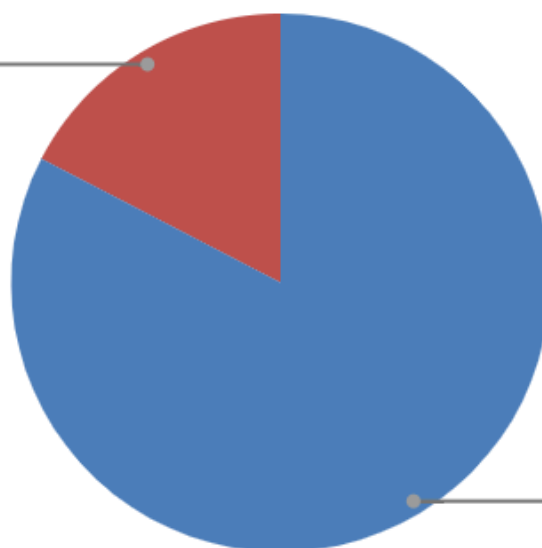

Overall test execution provided clear visibility into application stability and highlighted areas requiring improvement, particularly in negative and edge-case handling.

Test Execution Result – Pie Chart

Count

Failed

Passed

82.6%

Defects / Issues Identified

The following table summarizes the key issues identified during manual testing:

Defect ID	Test Case ID	Bug Summary	Priority	Severity	STR	Status
Bug_001	TC_004Signup with invalid email format	User is able to sign up with an invalid email format	Medium	Major	1. Enter invalid email format 2. Submit form	Open
Bug_002	TC_009Navigate product categories	Selected category option fails to highlight	Medium	Minor	1. Click on category menu 2. Select a category	Open
Bug_003	TC_012Add product to cart without login	Product is added to the cart without login	High	Critical	1. Select product 2. Click Add to Cart	Open
Bug_004	TC_015Checkout with empty cart	Place Order is enabled even when the cart is empty	High	Critical	1. Open cart 2. Click on Place order 3. Fill form 4. Purchase item	Open

Test Case & Execution Evidence

All test cases, execution results, predefined test data, and defect details have been documented in a structured spreadsheet.

 **Attached Document:**

- Test Case Document
- Test Execution Report
- Test Data Sheet
- Defect Log

Source Code & Assignment Repository

All assignment artifacts, including test documentation and execution evidence, are maintained in the following public Git repository:
